Is there any additional information you would like to provide to us:

We are no longer on the buffalo or receiving drinking water. We use our well water for everything but drinking & cooking. We are not happy with the scope of the testing that has been done or the infrequency of testing. Before using our well in Nov 2011, I dosed it with chlorine, and purged it for a week. It was orange for a while, but appears clear now. The filter must be changed weekly, or our pressure drops dramatically.

We drilled our well in 1992. We have used it for irrigation, where it ran 24-7. We never ran out of water, or had any cloudy, or discolor in 18-19 years.
